20 Hz - 200 Hz, F3 -3dB @ 20Hz

Woofers Type: Ultra-low distortion aluminum cone woofer

Woofers Size: (1) 12" /30cm

Finishes

Triad's Basic & Custom Finishes are available for this product. The standard finish for this product is White paint.

INWALL SILVER/15 SUB

The newly redesigned InWall Silver/15 Sub is the perfect choice where prodigious bass is desired without the imposing presence of an unattractive black box in your room. The InWall Silver/15 Sub features a 700 watt DSP amplifier, a long-throw, cast-basket 12" driver, and the most structurally solid inwall subwoofer enclosure available anywhere.

Now you can have serious built-in bass—not the weak bass from conventional open-back "woofer" designs that lack extension, articulation and output, but rather bleed unwanted sound into adjacent rooms. The new RackAmp 700 DSP amp provides simple "plug-and-play," and EZ set-up along with full adjustment control via a computer. You can have great performance right out of the box in nearly any room.

An elegant Acoustiperf grill can be custom ordered in any color to match your decor, further minimizing this subwoofer's visual impact upon the room. Where there is at least 15" of depth; in a false wall, a cabinet, or between 16" centered floor or ceiling joists; the InWall Silver/15 Sub is the one answer for powerful yet invisible bass.
